Headline Pricing Tiers

Tier	Monthly Price	What's Included
Starter / Foundation	\$2,500	Social + content + basic chatbot + analytics
Growth / Professional	\$6,500	Above + paid ads + email + lead gen + 1 automation
Scale / Full-Stack	\$12K–\$25K	Full stack + dedicated strategist + custom agent + GEO

Key insight: Lead with 5 anchor services where AI genuinely beats humans — Voice Agents, Chatbots, Lead Gen, Workflow Automation, and UGC Video Ads. These have the highest margins and the shortest sales cycles. Everything else is upsell.

Partner Recommendation

Don't launch with all 34 services. Pick **6 anchor services** for Stage 1 (months 0–3): Workflow Automation, WhatsApp + Web Chatbot, Voice Agent, Cold Email Lead Gen, UGC Video Ads, and AI SEO Content. Target 10 retainer clients at \$3,500/mo average = **\$35K MRR by month 6**. Then productize into the 3-tier bundles in Stage 2.

Dubai moat: Real for WhatsApp Business API, Arabic NLP, UAE PDPL compliance, and AED billing. Charge 20–30% premium on those services. Everything else competes globally at US/EU rates.

PART 2 — Full Service Catalog (Detailed)

Each service: what it is, pricing range, recurring/one-time, automation level, deliverables. All prices in USD. Pricing benchmarked against 2026 AI agency market data.

Pricing Models — When to Use Each

Model	Use For	Why
Setup fee + monthly retainer	Chatbots, voice agents, automations, ads, SEO, social	Predictable + covers infra costs
Pure monthly retainer	Content, social, fractional CMO, GEO	Standard market expectation
Per-project fixed fee	Audits, agent builds, websites, brand, SaaS MVP	Scope is clear
Per-minute usage	Voice agents only	Industry standard (\$0.07–\$0.50/min)
% of ad spend (10–20%)	Paid media management >\$10K spend	Aligns incentives
Performance + base retainer	Lead gen, CRO, GEO (advanced clients)	Premium tier — closes enterprise deals

Always include in contracts: AI token/API costs as line-item pass-through OR a 30% buffer in retainer; data ownership clause favoring the client; 60- or 90-day minimum commitment; overage rate for usage above bundle.

Recommended Launch Roadmap

Stage	Months	Focus	MRR Target
-------	--------	-------	------------

1 — Launch	0–3	Ship 6 anchor services (#11, #13, #14, #15, #16, #3)	\$10K
2 — Productize	4–9	Launch 3-tier packages (#32, #33, #34)	\$35K
3 — Specialize	9–18	Pick 1 vertical (real estate / hospitality / DTC)	\$75K
4 — Custom Practice	12+	Launch custom AI agent practice (#19)	\$150K+

Critical Caveats — Read Before Launching

Margin Killers to Avoid

- **Never bundle AI usage into flat retainers.** A single power-user can burn \$1,500–\$5,000/mo on a voice agent or chatbot. Always meter or buffer.
- **Don't charge hourly.** 2026 market has moved to retainer or performance pricing. Hourly looks junior.
- **Don't be the 'middle' agency.** Charging \$20K–\$40K for what is mostly AI output with minimal human curation is increasingly visible to clients.

Dubai-Specific Reality Check

- **Local SMB ceiling is ~AED 75,000 (\$20K) for chatbot/automation projects.** Don't price enterprise services for SMB clients.
- **Dubai premium is real for:** WhatsApp Business API, Arabic NLP, UAE PDPL, AED billing, same-timezone GCC delivery.
- **Dubai premium is NOT real for:** English-only content, cold email, US-targeted ads, generic GPT wrappers. Compete globally on those.

Compliance Premium

Regulated industries (finance, healthcare, legal) pay 20–40% premiums — but only charge this if you have actual compliance expertise. Data-exposure liability under UAE PDPL is severe.

Final Bottom Line

Pricing is a moving target. The numbers in this document are benchmarked against 2026 industry data and should validate within $\pm 15\%$ in the Dubai market. Re-price every 6 months. Track actual margins per client and kill services that consistently underperform.

All pricing in USD based on 2026 industry benchmarks from Digital Agency Network, Hashmeta AI, Prospeo, Mrkhan Digital, and 25+ other AI agency pricing sources. Validate against real Dubai market rates after first 5 clients.
